

MD. ALAMIN

Full Stack Developer

Satkhira Sadar, 9460 | +880 1911-508715 | mralamin5050333@gmail.com | [Linkdin](#) | [Github](#) | [Portfolio](#)

CAREER SUMMARY

I prioritize consistency, logical thinking, and continuous learning to build scalable full stack applications. To elevate my career, I combine structured analysis with rapid execution, thriving under pressure to solve problems across frontend and backend.

SKILLS AND STRENGTHS

Frontend - HTML5, CSS3, Tailwind CSS, DaisyUI, JavaScript, JSON.

Backend - Node.js, Firebase Authentication, JWT.

Framework & Library - Express.js, React.js, Next.js.

Database - MongoDB (NoSQL), Firebase.

Tools - GitHub, GitHub Actions, VS Code, Postman, Figma, Vercel, Netlify.

Soft Skills - Problem-solving, Logical thinking, Team collaboration, Communication, Time management, Continuous learning.

PROJECTS

1. ScholarStream | [Live](#) | [Client](#) | [Server](#)

ScholarStream is a web platform built to manage and digitize the entire scholarship process, allowing students, reviewers, and administrators to handle scholarship-related activities in one centralized system.

- Centralized scholarship application and payment workflows, secure role-based access, application tracking, and moderated reviews.
- Worked across student application/tracking, moderator review workflows, admin scholarship/user management, payments, and analytics.
- Built with MERN (MongoDB, Express, React/Vite, Node), Firebase Auth and JWT, Stripe, Tailwind CSS, DaisyUI, and Framer Motion.

2. StudyMate | [Live](#) | [Client](#) | [Server](#)

StudyMate is a web platform designed to help students find suitable study partners and connect with each other for collaborative learning, making studying more interactive and goal-oriented through a centralized online system.

- Centralized student matching and collaboration, secure authentication, real-time partner requests, profile management, and improved engagement and discoverability.
- Worked on partner discovery/search, connection management and CRUD dashboards, authentication/onboarding, and responsive UI/UX (theme, spinners, 404).
- Built with MERN (React/Vite, Node.js, Express, MongoDB Atlas), Firebase Auth & JWT, Axios, Tailwind CSS, DaisyUI, and Framer Motion.

3. Pet Care In Winter | [Live](#) | [Client](#)

Pet Care In Winter is a web platform created to help pet owners find winter-specific pet care services and manage their pets' care needs during cold weather through a single, easy-to-use online system.

- Centralized winter pet-care discovery and booking, secure user authentication and profile management, and streamlined booking/password recovery to keep pets safe and owners informed.
- Worked on service discovery and booking flows, protected service-detail and booking pages, profile management, and responsive UI/UX with animations.
- Built with React (Vite), Tailwind CSS, DaisyUI, Firebase Auth & Hosting, React Router, Swiper.js, AOS, and React Hot Toast.

EDUCATION QUALIFICATION

Graduation - BSC in CSE.

Institution - Uttara University.

Duration - 2021 to 2025.

Result - Graduated.

TRAINING & ACHIEVEMENTS

Training - Web Development Bootcamp – Programming Hero (Focus: MERN Stack & JWT).

LANGUAGE

Bangla - Native | English - Intermediate | Hindi - Conversational.
